Jakarta, March 14th 2024 – in the middle of this month, IDXCarbon launched our very first webinar series. Targetting all of our current and potential users along with all listed companies in Indonesia Stock Exchange, the series will discuss various aspects about setting companies strategies to embrace decarbonization in doing their business. The first seminar featured Bondan Susilo of Astra International and Nur Arifiandi of CDP, and providing a deep context for the participating companies on how carbon-based economy shall impact their business.

As stated in POJK No. 51/POJK.03/2017, all financial services companies and listed companies are required to issue their own sustainability report. The report should include their carbon footprint calculation as well as their strategies to reduce their emission. To support this initiative, IDXCarbon and Indonesia Stock Exchange are providing various services for their users and listed companies. More seminars, programs, and initiatives will be launched in this year, mostly crafted for exchange users and listed companies to create their own pathway for a greener business.
